

## DEGRI-COVER

### Plastic Protection For Your Crop

- Insures your maize crop against adverse weather - helps to protect from frost, high winds and drought
- Boosts quality yields by harnessing the micro-climate created under Degri-Cover
- Oxo-degradable - calcium based for controlled degradability
- 10 micron pin hole film - compatible with existing machinery

**PROTECTS**

**BOOSTS YIELDS**

**OXO-DEGRADABLE**

- ▶ Degri-Cover can boost quality yields by harnessing the micro-climate it creates
- ▶ Degri-cover offers weed and pest control benefits and assists water management
- ▶ Degri-Cover is proven in the toughest marginal maize growing areas
- ▶ Degri-Cover can boost the starch and energy content of your maize crop

## Specification

Roll Size:	1.37m x 3100m 10mu with crop specific perforations
Core Size:	76mm core to suit existing standard poly layers
Roll Weight:	38kg rolls
Coverage:	2 rolls per hectare
Delivery:	16 rolls per pallet

*In very marginal areas, sowing maize under plastic may be the only way to harvest a mature crop*

- ▶ Degri-Cover is a calcium based product which is Oxo-degradable - a process that results in the plastic degrading into microfragments into the soil and eliminates the need to dispose into landfill
- ▶ Degri-Cover does not use iron based additives which can leave harmful deposits in soil
- ▶ Degri-Cover is compatible with existing machinery and process

In Limagrains trials, all LG varieties - both early maturing and later maturing - have successfully emerged through plastic and reached maturity by harvest
